Not to mention the mindnumbing, brain tumor causing difficulty spike because of the jumping mechanic.. Would not kill myself to again As of now, I do not recommend this game The controls are just too clunky.. 99 pricing is unjustifiable for the games current state, however if it were to improve with time I would like to make this review a positive one, as the concept of gameplay is enjoyable and it has potential.

I'm going to keep on playing this game , and if I feel it deserves a positive review, I will change this one.. It doesn't register controls instantly, sometimes it doesn't register hops at all, the fire ability thing you have does not always get thrown when you try to throw it, and you can only throw the fire in 3 directions, directly up, directly down, or in a set position.

1/3 of your time spent on this game will be spent on one screen The music on the title screen is decent, but for literally the rest of the game there is no music.. At the games current state, the controls are very clunky, missed keys while jumping and throwing.. All keys become somewhat unresponsive, making you stuck on clipping paths The camera sometimes makes it really difficult to see what lies ahead but it doesn't matter because you can charge through enemies and take no damage, the only way I've died over and over is because of sticky controls and falling off a place where I should jump but cannot see due to set camera angles. This game would be good at its state if it were in Beta or Alpha but not as a full release just yet, I feel as though the \$9.. the main keys are A D to move back and forth, WS to shoot up or down, SPACE jump and R for fire throwing move..
ly/2SRvkSMAbout This GameAn action game GHRIAN allows players to act as heros in a plage-stricken world which is horrific but still beautiful.. If graphic mode is on beautiful or fast, it doesn\u2019t change the character\u2019s lack of facial definition and blurred outlines (the background becomes more defined though).. GHRIAN adopts an unique game mechanics to play transforming dotted glimmerings, such as flambeaus or light streaming from windows, into power using a capability of a mysterious mask..
